TIMELESS BEAUTY, MODERN SCIENCE

A COMPLETE JOURNEY
THROUGH FACIAL ANATOMY, HARMONY
& AESTHETICS FROM EVERY ANGLE.

7 SEP 2026
CAIRO – EGYPT

TIMELESS BEAUTY, MODERN SCIENCE

Comprehensive 6-Hour Masterclass

Integrating Facial Anatomy, Injectables, Lasers & Energy-Based Devices, and Surgical Rejuvenation

Masterclass Overview

This intensive 6-hour educational masterclass is designed to provide physicians with a comprehensive understanding of modern facial beautification through a multidisciplinary and evidence-based approach. The program combines advanced facial anatomy, injectable therapies, energy-based technologies, and surgical rejuvenation concepts to create a complete full-face treatment strategy.

Participants will learn how to assess facial aging, select the appropriate modality for each patient, safely perform injectable procedures, integrate lasers and EBDs into treatment plans, and understand when surgical intervention becomes essential.

Scientific Program

Opening Remarks & Introduction – 15 minutes

- The shift from isolated treatments to full-face harmonization
- Understanding modern patient expectations
- The importance of multidisciplinary rejuvenation
- Overview of integrated treatment concepts

SESSION 1 — FACIAL ANATOMY & AGING - 60 Minutes

Advanced Anatomical Concepts for Safer & Better Outcomes

Topics Covered:

- Layer-by-layer facial anatomy
- Facial retaining ligaments
- Superficial and deep fat compartments
- Facial vascular anatomy and danger zones
- Facial musculature and dynamic aging
- Bone resorption and structural changes with aging
- Anatomical differences between male and female faces
- Ultrasound anatomy concepts in aesthetics
- Anatomy-driven treatment planning

SESSION 2 — FULL FACE INJECTABLES APPROACH - 75 Minutes

Part I — Neuromodulators

Topics Covered:

- Upper face toxin strategies
- Brow shaping and lifting
- Forehead balancing techniques
- Male vs female toxin patterns
- Lower face toxin applications
- Neck and platysma treatment
- Facial slimming concepts

Part II — Dermal Fillers

Topics Covered:

- Structural vs superficial filler placement
- Full-face assessment before injection
- Midface lifting and support
- Temple rejuvenation
- Tear trough correction
- Jawline contouring
- Chin projection and balancing
- Lip enhancement techniques
- Liquid rhinoplasty concepts
- Full-face harmonization

Part III — Regenerative Injectables

Topics Covered:

- Skin boosters
- Biostimulators

- Polynucleotides
- Hybrid injectables
- Collagen stimulation concepts

Complications Management

Topics Covered:

- Vascular occlusion prevention
- Emergency management protocols
- Ultrasound in complication management
- Delayed inflammatory reactions
- Hyaluronidase protocols

Coffee Break – 15 minutes

SESSION 3 — LASERS & ENERGY-BASED DEVICES - 60 Minutes

Skin Resurfacing Technologies

Topics Covered:

- Fractional CO2 lasers
- Erbium laser technologies
- Hybrid resurfacing systems
- Indications and patient selection

Skin Tightening Technologies

Topics Covered:

- Radiofrequency technologies
- Microneedling RF
- HIFU systems
- Ultrasound-based tightening

Pigmentation & Vascular Applications

Topics Covered:

- IPL technologies
- Vascular lasers
- Rosacea and pigmentation management
- Melasma considerations

Combination Therapy Concepts

Topics Covered:

- Combining injectables with EBDs
- Treatment sequencing
- Downtime optimization
- Safety in darker skin types

SESSION 4 — SURGICAL FACE BEAUTIFICATION – 60 minutes

Surgical Facial Rejuvenation

Topics Covered:

- Deep plane facelift concepts
- Mini facelift vs full facelift
- Neck lifting procedures
- Fat grafting in facial rejuvenation

Periorbital Rejuvenation

Topics Covered:

- Upper blepharoplasty
- Lower blepharoplasty
- Brow lifting techniques
- Surgical management of periocular aging

Structural Beautification

Topics Covered:

- Chin augmentation concepts
- Facial contouring procedures
- Surgical rhinoplasty overview

Surgical Decision-Making

Topics Covered:

- Patient selection
- Surgical vs non-surgical algorithms
- Combination approaches
- Managing patient expectations

SESSION 5 — LIVE DEMONSTRATIONS & INTERACTIVE CASE DISCUSSION - 60 Minutes

Live Demonstration Topics:

- Full-face injectable treatment
- Ultrasound-guided injections
- Facial balancing concepts

Closing Remarks & Q&A

MASTERCLASS SCHEDULE

Session	Duration
Opening Remarks & Introduction	15 minutes
Session 1 — Facial Anatomy & Aging	60 minutes
Session 2 — Full Face Injectables Approach	75 minutes
Coffee Break	15 minutes
Session 3 — Lasers & Energy-Based Devices	60 minutes
Session 4 — Surgical Face Beautification	60 minutes
Session 5 — Live Demonstrations & Interactive Case Discussion	60 minutes
